

Branching Statements

Break Statement

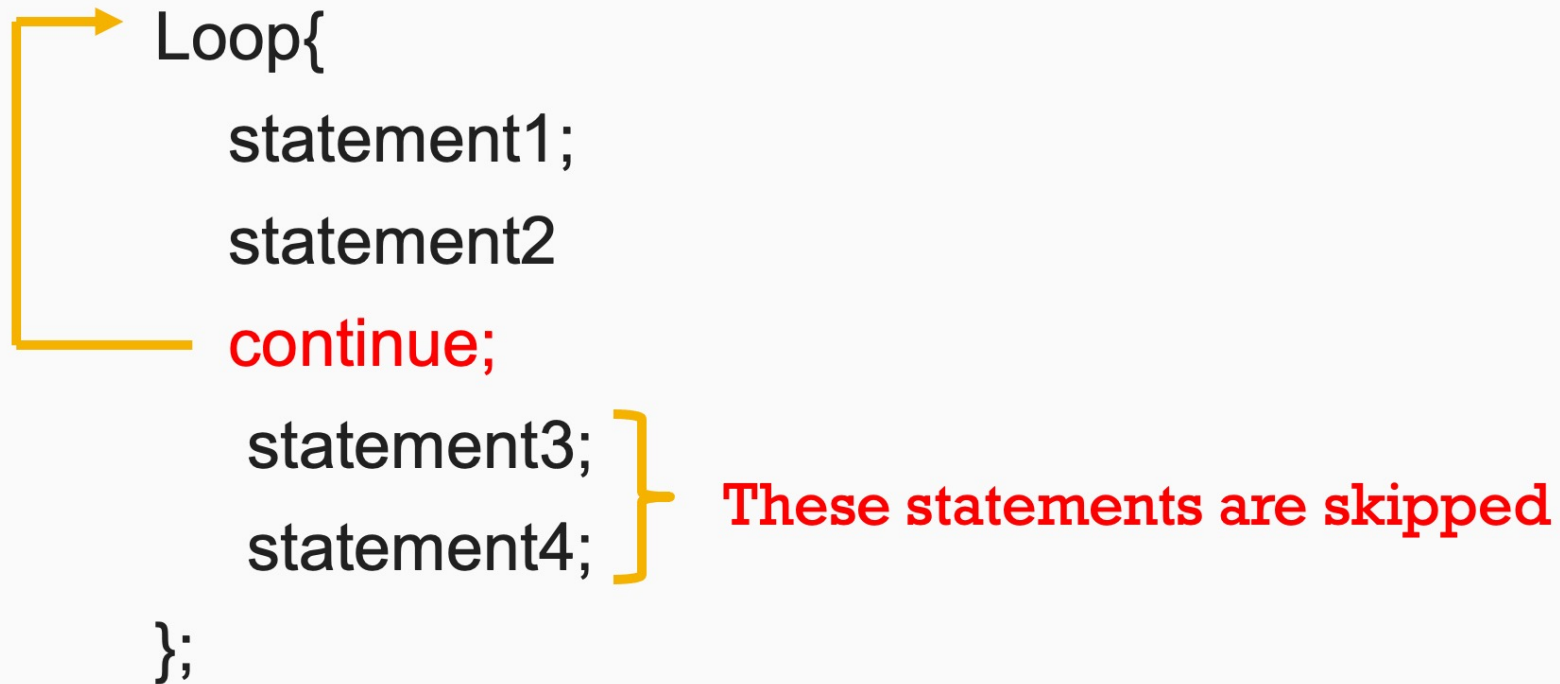

- Causes the termination of the loop.
- Tells the interpreter to go onto the next statement of code outside of the loop.

Continue Statement

- Skips the current iteration of the loop and jumps to the next iteration.

```
Loop{  
    statement1;  
    statement2  
    continue;  
    statement3;  
    statement4;  
};
```

These statements are skipped
